

Sprint 3 Report

Product name: editThis

Team name: The Edit Team

Date: 11/20/17

Actions to Stop Doing

- Stop writing code that is hard to understand for other members
- Stop arriving late to meetings especially with TA. The TA has other groups to get to and by arriving late, our time is not being used efficiently and people will get worried.

Actions to Start Doing

- Start taking individual initiative to complete tasks instead of waiting for other members. Some tasks may be blocked from completion because they require other tasks to be completed first, however given enough knowledge of how a prerequisite task is being implemented the task should not be entirely blocked.
- Start asking for help if needed.
- Communicate about where you are in your work and always demonstrate your code in case it confuses other members.
- Communicate about whether you can make it to the scrum meeting or not. (Especially in the rare case that you can't make it)

Actions to Keep Doing

- Good clear communication to keep members all updated on status of user stories.
- Being honest about work that is getting done.
- Meeting consistently to bring up any issues that team members may have trouble with.
- Helping each other with any blockers

Work Completed

- Sharable link
- Main page / screen
- Pen tool works on canvas
- Fill tool with selection box
- Drawing in color

Not Completed

- Being able to select area of photo and crop
- Stickers and captions
- Uploading edited photo back to the group
