Sprint 1 Report

Product name: editThis
Team name: The Edit Team
Date: 10/23/17

Actions to Stop Doing
-Stop underestimating time that needs to be taken for certain tasks. This was evident in that we were unable to get many user stories done due to needing more time to get familiar with the development languages and libraries.
-Stop getting caught up in just researching. During many situations we may have felt that we needed to get more research done to find the best way to implement a part of our project however, we could have accomplished more if we just tried to start implementing sooner and without as much research.

Actions to Start Doing
-Start going to meetings on time consistently. This is required so we don't waste anyone's time.
-Start taking individual initiative to complete tasks instead of waiting for other members. Some tasks may be blocked from completion because they require other tasks to be completed first, however given enough knowledge of how a prerequisite task is being implemented the task should not be entirely blocked.

Actions to Keep Doing
-Good clear communication to keep members all updated on status of user stories.
-Being honest about work that is getting done
-Meeting consistently to bring up any issues that team members may have trouble with

Work Completed
-Server setup
-Learning SQL
-Learning React

Not Completed
-Being able to upload photo to server
-Being able to draw on photo
-Being able to select area of photo
-Being able to select a color with a color wheel
-Implementing way to form groups

Work Completion Rate
0 User Stories Completed
21 Ideal Hours
14 Days in sprint

User stories/day: 1/10
Ideal hours/day: 1.5
